Contents

Letters to the Editor

On the 21-μm feature of pre-planetary nebulae
Sourisseau, C., Coddens, G., Papoular, R. L1

Be star surveys with CCD photometry. I. NGC 330 and its high Be star content
Grebel, E.K., Richtler, T., de Boer, K.S. L5

Astrophysical implications of the direct measurement of the $^{13}N(p,\gamma)^{14}O$ cross section
Arnould, M., Paulus, G., Jorissen, A. L9

Duplicity in the solar neighbourhood. VI. The highly eccentric spectroscopic binary Gl 586 A and associated multiple system
Duquennoy, A., Mayor, M., Andersen, J., Carquillat, J.-M., North, P. L13

Detection of compact SiO maser emission at 43 GHz using a European very long baseline interferometer
Colomer, F., Graham, D.A., Krichbaum, T.P., Rönnäng, B.O., de Vicente, P., Witzel, A., Barcia, A., Baudry, A., Booth, R.S., Gómez-González, J., Alcolea, J., Daigne, G. L17

ROSAT active galactic nuclei identified on objective prism plates
Bade, N., Engels, D., Fink, H., Hagen, H.-J., Reimers, D., Voges, W., Wisotzki, L. L21

The ionization of the diffuse gas in NGC 891 and the decaying dark matter theory
Dettmar, R.-J., Schulz, H. L25

NTT discovery of a radio-quiet giant elliptical galaxy with $z = 1.013$ in the neighbourhood of the quasar 3C 245
Le Fèvre, O., Hammer, F. L29

A polarized accretion disk flare in OJ 287?
Sillanpää, A., Takalo, L.O., Nilsson, K., Kidger, M., de Diego, J.-A. L33

An extremely active giant star: HD 218153
Renan de Medeiros, J., Mayor, M., Simon, T. L36

Discovery and early X-ray lightcurve of the transient GRS 1124–68 (Nova Muscae 1991)
Brandt, S., Castro-Tirado, A.J., Lund, N., Dremin, V., Lapshov, I., Sunyaev, R. L39

Cosmology

(RN) The candidates for the Great Attractor and the fluctuations in the microwave background radiation
Goicoechea, L.J., Martin-Mirones, J.M. 1

Anisotropies of the cosmic background radiation and characteristic scale of a cellular-fractal universe
Fabbri, R., Ruffini, R. 7

Extragalactic astronomy

Inversion of the amplification bias and the number excess of foreground galaxies around high-redshift QSOs
Schneider, P. 14

Is there a megaparsec component to 3C 48?
Woan, G. 25

A possible explanation for intraday variability in active galactic nuclei. Magnetic reconnection and coherent plasma emission
Lesch, H., Pohl, M. 29

A search for excess galaxies around distant flat-spectrum radio quasars
Fried, J.W. 39

A powerful, ultra-steep spectrum radio galaxy having an extremely low-excitation emission line spectrum
Gopal-Krishna, Giraud, E., Melnick, J., Steppe, H. 42

Some constraints on the origin of the iron enriched intracluster medium
Arnaud, M., Rothenflug, R., Boulade, O., Vigroux, L., Vangioni-Flam, E. 49

Rapid variations and a large infrared antiflare in the light curve of Markarian 501
Kidger, M., Takalo, L., de Diego, J.A. 65

Five years monitoring of extragalactic radio sources. III. Generalized shock models and the dependence of variability on frequency
Valtaoja, E., Teräsranta, H., Urpo, S., Nesterov, N.S., Lainela, M., Valtonen, M. 71

Five years monitoring of extragalactic radio sources. IV. Variability statistics and unified models for AGN
Valtaoja, E., Teräsranta, H., Urpo, S., Nesterov, N.S., Lainela, M., Valtonen, M. 80

(RN) The minor-axis dust-lane elliptical NGC 1947
Bertola, F., Galletta, G., Zeilinger, W.W. 89

(RN) The use of velocity dispersion in globular clusters as a distance indicator
Paturel, G., Garnier, R. 93

Massive binary black holes and wiggling jets
Kaastra, J.S., Roos, N. 96

Galactic structure and dynamics

On the nature of the dark halo of our Galaxy
De Rújula, A., Jetzer, P., Massó, E. 99

K giant magnitude calibration from parallaxes
Gould, A., Flynn, C. 105

Stellar clusters and associations

IUE observations of UV-bright stars in M3
Buzzoni, A., Cacciari, C., Fusi Pecci, F., Buonanno, R., Corsi, C.E. 110

Formation, structure and evolution of stars

Red/infrared observations of Wolf 424 AB: are the components substellar?
Henry, T.J., Johnson, D.S., McCarthy Jr., D.W., Kirkpatrick, J.D. 116

Resonance transitions to inert neutrinos in supernovae
Peltoniemi, J.T. 121

The long-period symbiotic binary CH Cygni. II. The M giant component: increasing pulsation period and spot-like activity
Mikolajewski, M., Mikolajewska, J., Khudyakova, T.N. 127

A complete survey of OH/IR objects from the IRAS LRS sources within a domain of the color diagram
Le Squeren, A.M., Sivagnanam, P., Dennefeld, M., David, P. 133

Lunar occultations of southern near-infrared stellar sources
Richichi, A., Lisi, F., Di Giacomo, A. 149

Electron acceleration at a supernova blast wave. A model for the prompt radio flare from SN 1987 A
Kirk, J.G., Wassmann, M. 167

Carbon detonations in rapidly rotating white dwarfs
Steinmetz, M., Müller, E., Hillebrandt, W. 177

Nucleosynthesis in a thick accretion disk around a 10 $M_\odot$ black hole
Arai, K., Hashimoto, M. 191

On the decay of the magnetic fields of single radio pulsars
Bhattacharya, D., Wijers, R.A.M.J., Hartman, J.W., Verbunt, F. 198

Advantages and limitations of the bipolytrope model for computing the secular evolution of cataclysmic binaries
Kolb, U., Ritter, H. 213

Stellar atmospheres

Monte Carlo simulations of Raman scattered O VI emission lines in symbiotic stars
Schmid, H.M. 224

A two-wind radiation-driven model for the atmospheric features of β Lyrae
Mazzali, P.A., Pauldrach, A.W.A., Puls, J., Plavec, M.J. 241

The calcium infrared triplet lines in stellar spectra
Jørgensen, U.G., Carlsson, M., Johnson, H.R. 258

High resolution spectroscopic observations of the massive binary RY Scuti
de Martino, D., Vittone, A.A., Rossi, C., Giovannelli, F. 266

Line scattering in an expanding shell: interferometric and polarimetric profiles
Lefèvre, J. 274

A modelling of circumstellar BA II lines for the hypergiant ϱ Cassiopeiae
Gesicki, K. 280

Optical spectra of ζ Aurigae binary systems. III. The 1989 eclipse of τ Persei
Griffin, R.E.M., Schröder, K.-P., Misch, A., Griffin, R.F. 289

Diffuse matter in space (including H II regions and planetary nebulae)

Cavities around progenitors of Ib SNe: Effelsberg H I observations towards six galactic Wolf-Rayet stars
Arnal, E.M. 305

SiO emission as a tracer of shocked gas in molecular outflows
Martín-Pintado, J., Bachiller, R., Fuente, A. 315

CH^+ λ3957 towards ζ Ophiuchi
Stahl, O., Wilson, T.L. 327

Evolution of a self-gravitating protocloud with turbulence
Battinelli, P., Capuzzo-Dolcetta, R., Di Fazio, A., Urpin, V.A., Vereshchagin, S.V. 331

Optical traces of two IRAS sources driving bipolar outflows in the S 287 molecular cloud
Neckel, T., Staude, H.J. 339

The Sun

Solar radial velocity and oscillations as measured by sodium and potassium resonant scattering spectrometers
Pallé, P.L., Régulo, C., Roca Cortés, T., Sánchez Duarte, L., Schmider, F.X. 348

High spatial resolution magnetograms of solar active regions
Keller, C.U., Stenflo, J.O., von der Lühe, O. 355

A nonlocal convection model of the solar convection zone
Xiong, D.R., Chen, Q.L. 362

Estimating the degradation of brightness power spectra of solar granulation from images outside the disk centre
Rodríguez Hidalgo, I., Collados, M., Vázquez, M. 371

About spectroscopic measurements of the solar meridional motion
Cavallini, F., Ceppatelli, G., Righini, A. 381

The solar system

Differential VLBI measurements of the Venus atmosphere dynamics by balloons: VEGA project
Sagdeyev, R.Z., Kerzhanovitch, V.V., Kogan, L.R., Kostenko, V.I., Linkin, V.M., Matveyenko, L.I.,

Nazirov, R.R., Pogrebenko, S.V., Struckov, I.A., Preston, R.A., Purcel, J., Hildebrand, C.E., Grishmanovskiy, V.A., Kozlov, A.N., Molotov, E.P., Blamont, J.E., Boloh, L., Laurans, G., Kaufmann, P., Galt, J., Biraud, F., Boischot, A., Ortega-Molina, A., Rosolen, C., Petit, G., Mezger, P.G., Schwartz, R., Rönnäng, B.O., Spencer, R.E., Nicolson, G., Rogers, A.E.E., Cohen, M.H., Martirosyan, R.M., Moiseyev, I.G., Jatskiv, J.S. 387

Physical study of the asteroid 243 Ida, second fly-by target of the Galileo spacecraft
Gonano-Beurer, M., Di Martino, M., Mottola, S., Neukum, G. 393

Celestial mechanics and astrometry

CPC 2 – the Second Cape Photographic Catalog. II. Conventional plate adjustment and catalog construction
Zacharias, N., de Vegt, C., Nicholson, W., Penston, M.J. 397

Physical and chemical processes

A note on positivity of equilibrium populations in radiative transfer theory
Damgaard, P.H., Hjorth, P.G., Thejll, P.A. 422

The effect of coupling of a corona to the turbulence in an accretion disk
Geertsema, G.T., Kuperus, M. 426

On the analysis of collision strengths and rate coefficients
Burgess, A., Tully, J.A. 436

Cooling functions for hot dense gas: application to accretion discs in close binaries
Dumont, A.M. 454

Non-equilibrium, non-LTE ionization in supernova remnants
Brinkmann, W. 460

Instruments, data processing, and computational methods

The OH airglow spectrum: a calibration source for infrared spectrometers
Oliva, E., Origlia, L. 466
